---

## TECHNICAL SKILLS

- **Languages:** Java, JavaScript/TypeScript, C#, C, Haskell, SQL, HTML, CSS
  - **Tools/Frameworks/etc.:** Linux, VMware, Docker, GCP, Node.js, Express, Nest, React, .NET, MySQL, PostgreSQL, MS SQL, MongoDB, Entity Framework, TypeORM, REST, GraphQL, JUnit, Mocha, Chai, Git, Azure DevOps, Jenkins, Datadog, Postman
- 

## WORK EXPERIENCE

### Web Development Co-op, BGC Engineering, Vancouver, BC

Sep 2023 – Apr 2024

- Developed customized forms for real-time geohazard monitoring, enhancing data accuracy and user experience, and revamped .NET API to streamline SQL data migration for ~2 million rows
- Created customizable data tables for 200+ SaaS clients, improving user interaction and data management, and implemented authorized workflows and filters using C# and EF migrations
- Worked with ESRI and GIS technologies to integrate and manage geospatial data, contributing to improved data visualization and geographic analysis capabilities

### Backend Software Engineer Intern, Calabrio, Inc., Vancouver, BC

Jan – May 2023

- Enhanced AWS S3 integration in Java/Haskell for cloud-based file management by restructuring APIs, leading to a 15% reduction in server response time
- Monitored application performance using Datadog, tracking errors and troubleshooting issues to ensure system reliability and efficiency

### Reservist, National Defence, Vancouver, BC

Nov 2016 – Dec 2019

- Served in the Canadian Army for over 3 years, developing skills in military operations and ethical values
- 

## PROJECTS

### VanCity Property Pulse

May – Aug 2023

- Designed and implemented a full-stack web application, utilizing React and Node frameworks
- Developed real-time data visualization by integrating external APIs, showcasing dynamically updated information
- Handled authentication of the application with Node.js's passport library and its Google authentication strategy

### Farm You

Jul 2022

- As a backend engineer, collaborated with frontend engineers to create an e-commerce website mock-up, implementing the backend functionalities with JavaScript, utilizing TypeORM, MySQL, and other tools
  - Tested the functionality of the APIs while building them, using the local database and GraphQL Playground
  - Handled authentication of the app with Node.js' passport library (JWT) and by hashing passwords with BCrypt
  - Deployed the website and practiced CI/CD, using the relevant GCP products
- 

## EDUCATION

### Bachelor of Computer Science

Sep 2020 – Aug 2024

University of British Columbia, Vancouver, BC

- **Relevant Coursework:** Basic Algorithms and Data Structures, Intermediate Algorithm Design and Analysis, Introduction to Software Engineering, Introduction to Computer Networking, Introduction to Relational Databases
- Received the Athena Pathways Scholarships

### Bachelor of Music, Piano Performance

Sep 2008 – Aug 2011

McGill University, Montreal, QC

- Received the Schulich Scholarship and the Entrance Scholarship
